

Alphabet Treasure Activity Card

This will test your child's understanding of letters and sounds using a variety of objects to sort and categorise, all the while learning to be patient and to take turns.

WHAT DO I NEED

1. Empty boxes that are big enough to hold objects i.e. a shoe box
2. Pieces of card with letters of the alphabet on - these could perhaps be the letters of your child's name
3. A bag containing objects with initial sound that match the alphabet cards you created
4. Glue

METHOD

1. Glue one letter on the side/top of each box and ask your child if they recognise each letter
2. Hold the bag containing the objects and ask your child to take an object from the bag
3. Encourage your child to identify the initial sound in the word and place it in the box labelled with the matching letter i.e. putting a ball in the box labelled with the letter B
4. Now it's your child's turn to hold the bag for you to select an object
