

# Match the Sound Activity Card

It's a classic pairing game – but with focusing on matching the sounds. If you child enjoys this game, you can make more bottles with different objects inside to match!

## WHAT DO I NEED

1. 2 bottles partially filled with water
2. 2 bottles partially filled with pebbles
3. 2 bottles partially filled rice (you can get your child involved in making the bottles)
4. A screen to hide bottles behind

## METHOD

1. Sit on the floor with your child opposite you and explore the bottle sounds together
2. Put a small screen in front of you (this could be a large tray on its side or an empty box)
3. In front of the screen place one bottle filled with water, one filled with pebbles and another filled with rice
4. Put the matching set of bottles behind the screen out of sight of your child and ask them to listen
5. From behind the screen and out of site of your child shake one of the bottles
6. Can your child find the matching bottle from their set in front of the screen?
7. You can then increase the difficulty by creating a sequence of sounds and ask your child to repeat the sequence
8. Let your child have a turn of making the sound or sequence and you match it
