

# Nature Rainbow Activity Card

Nature provides so many resources for learning and fun! When you are next out on a family walk collect as many different colour leaves, flowers and anything else you can find!

## WHAT DO I NEED

1. A collection of different natural resources
2. Paper
3. Glue

## METHOD

1. Lay out all the resources that your child has gathered
2. Ask them to put them in to colour piles
3. Provide them with paper and glue to create their artwork using their natural resources, discuss the different patterns, textures and smells
4. Tip - you can do this activity outside without the use of glue and paper to allow your child to create their patterns in the grass
